Untitled

Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see https://quarto.org.

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this: x^2

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

Figure 1: Elephant

See [Figure 1](#) for an illustration.

$$x = a/(b+c)$$

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).
